WORK EXPERIENCE

Disney+ Hotstar

Software Development Engineer 2

Bengaluru

April 2021 - Present

- Integrated a SaaS Logging platform with existing Kubernetes clusters to enable **long-term retention of application logs**.
- Manage and Upgrade multiple Kubernetes Clusters **without any downtime**.
- Mentor college interns** by giving them requirements and helping them design and build an internal portal for **Access Management on AWS**.
- Took on-call responsibility for DevOps team during high traffic events and **resolved Live issues**.
- Tech Stack: Kubernetes, Terraform, Docker, Prometheus, Victoria Metrics, AWS

Disney+ Hotstar

Software Development Engineer

Bengaluru

August 2021 - March 2022

- Designed, Implemented and shipped new features on internal applications. This **decreased time to deploy new applications on Kubernetes by 40%**.
- Improved monitoring stack and helped maintain **service availability of 99.95%** by integrating Grafana and Victoria Metrics with backend services.
- Developed a tool which allowed backend services to fail gracefully when there is traffic congestion, resulting in **enhanced user experience** and **better customer retention**.
- Tech Stack: Kubernetes, Docker, React, Ruby on Rails, Prometheus, Victoria Metrics, AWS, DevOps

Thoughtworks

Application Developer

Bengaluru

June 2019 - August 2021

- Doubled the revenue** of a large e-commerce company by building scalable and reliable microservices which helped the company move to a Marketplace business model.
- Automated performance tests** using Python and Locust to benchmark backend services. This helped discover API endpoints with large response time.
- Optimized inefficient JPA queries using Entity Graph, this enabled the backend services to handle over **3000 requests/second**.
- Enhanced developer experience by adding integration tests using Junit and Mockito for existing backend services. This reduced frequency of bugs and **increased availability of services**.
- Organized multiple Data Analysis workshops using Python and Pandas, in collaboration with She Loves Data.
- Mentored new graduates** and onboarded them in new projects by sharing assignments, performing code walkthrough and code reviews.
- Tech Stack: Java, Spring Boot, Angular, Microservices, PostgreSQL

Thoughtworks

Application Developer Intern

Bengaluru

January 2019 - April 2019

- Trained in Agile Methodologies and industry best practices like TDD and Pair Programming.
- Developed a fullstack e-commerce application using Spring MVC to enable a business to sell their products online.
